DOMINIK GOLEBIEWSKI

Database Developer

@ dominik@golebiewski.co.uk ⚲ Spennymoor, UK

SUMMARY

Organised and self-motivated Database Developer with 4+ years of success designing and implementing database solutions in Snowflake and DBT. Goal-orientated with ability to understand business problems and create systems to improve functionality. Work effectively independently and in collaborative settings.

EXPERIENCE

Database Developer
Atheon Analytics

10/2019 - Present
Fully Remote, UK

Designed and implemented database solutions for high volume, high performance projects resulting in increase efficiency.

- Developed effective modular SQL and Jinja scripts utilising DBT and Snowflake, resulting in enhanced performance.
- Designed internal database tools utilising Snowflake, Streamlit, and Python to enhance productivity and cycle time.
- Developed a testing framework and an internal DBT package to facilitate case tests for data pipelines.
- Refactored transformation architecture resulting in a ~70% performance increase and ~60% Snowflake credits reduction.
- Designed and implemented the back-end database that provides data to the BI tool Tableau and the end user.
- Supported junior developers and customer support with database-related questions, resulting in increased productivity and quicker delivery.
- Achieved Snowflake SnowPro Core accreditation.

Junior Database Developer
Atheon Analytics

10/2018 - 10/2019
Cranfield, UK

Participated in the redesign and rollout of new ETL processes.

- Enhanced customer satisfaction and expedited delivery by assisting customer support with database queries.
- Participated in the redesign and implementation of ETL processes for legacy customer data outside of normal business hours to ensure timely and error-free data migration.
- Improved understanding of the most recent technologies, Python, and the Snowflake data warehouse in the Cloud.

SQL Developer
XPO Logistics

09/2016 - 10/2018
Milton Keynes, UK

Developed internal reports and dashboards in Microstrategy and PL/SQL

- Developed database application automation using Visual Basic and Excel VBA.
- Data analysis using Excel and PL/SQL.

EDUCATION

Degree and Field of Study
Pawel Wlodkowic University College in Plock

2008 - 2012
Płock, PL

STRENGTHS

★ **Efficient Problem Solver**
Proven ability to design and create efficient solutions that deliver results, even for high-volume, high-performance projects.

☆ **Team Player**
Collaborative worker who builds strong relationships with cross-functional teams to drive successful outcomes.

⚑ **Effective Communicator**
Excellent interpersonal and communication skills, with a track record of presenting complex ideas to both technical and non-technical stakeholders.

SKILLS

Snowflake · Database design · Data modeling · Data warehousing · ETL processes · DBT · Performance tuning · Query optimization

ACHIEVEMENTS

💡 **Database Optimization Project**
Led an initiative to optimize database performance, resulting in a ~70% improvement in query response times.

♥ **Data Migration Project**
Participated in a complex data migration project, ensuring no data was lost and all systems were up and running on schedule.

EDUCATION

IT Technician
Date period

Plocki Uniwersytet Ludowy
Płock, PL

A-Levels
Date period

Grammar School
Ladek Zdroj, PL
